

«Join a team that develops innovative, globally unique solutions and implements them in customer projects »

e3 AG has been a **successful** and **innovative IT software development** and **consulting** company since 2000. We offer our clients in **Zurich** and **Bern** services in the areas of **IT strategy consulting**, **software quality assurance** and **IT project management**. We also develop our own **security software products** for the international market. Our well-positioned, well-functioning and successful team is **looking for new players!**

## Software Testautomation Engineer (m/w) (Zürich)

### Tasks

For our team in the internal department Products we are looking for a dedicated, experienced Software Test Automation Engineer (m/f) with very good Java skills or a Junior Java Software Developer (m/f) with empathy for testing. The main tasks include test case and test data test design, test automation and test execution, both manual and automated. Other tasks such as maintenance of the test environment, support, creation of test data or test tools are also part of the extended tasks as it is usual in a small test team. Since we rely very intensively on Java and JUnit5 for the test automation and in the future also want to use Java in combination with Selenium, sound Java knowledge is a must.

In the foreground stands the testing of our own developed software products in the area of Data Loss Prevention (DLP) and Cloud Access Security Broker (CASB). As a manufacturer of security software, basic knowledge in the areas of IT security and networking is required.

### Profile/Knowledge

#### Education:

- (Technical) university degree in computer science or an equivalent course of study
- Several years of practical experience in software product development

#### Technical knowledge

- Experience with Java, JavaEE, Spring, Docker, Hibernate and JUnit
- Knowledge of Angular, Bootstrap
- Know-How in IT Security and JCE
- Dealing with Git, Maven and Jenkins is a matter of course
- Very good SQL knowledge
- Knowledge of web and micro services
- DB design and DB admin experience are advantageous (especially Oracle)

#### Further requirements

- General good understanding of software engineering processes and procedures
- Experience in agile software development (SCRUM)
- Very high degree of independence in solving problems
- Good written and spoken English
- Balanced and resilient personality and team spirit are a must

#### e3 offers you:

- Dynamic environment that allows for innovative ideas
- Varied activity, conceptual and practical
- Opportunity for continuous on- and off-the-job training
- Top Team Spirit in an innovative SME.

**Do you feel addressed? Then we would like to get to know you!**
